

VECT.AI TOKEN — TECHNICAL SPECIFICATION & TOKENOMICS

Network: Solana Mainnet-Beta

Standard: SPL Token (optionally Token-2022 extensions)

Current Temporary Mint (Placeholder Brand):

J7gr5uPExeRmTc6GdVNyXj4zmYdXmYLYFC5TkkDngm4x

Ticker: VECT (temporary) → to be migrated to VECT.AI

Decimals: TBD (8 or 9 recommended for Solana)

Total Supply: TBD (max supply and initial circulating supply to be defined)

Mint Authority / Freeze Authority: TBD (plan: revoke or move to timelocked multisig)

Use Cases

- Governance token for protocol-level decisions
- Staking incentives and reward distribution
- Protocol fee sharing (to be enabled post-launch)
- Contributor & team vesting structure

Programmability

- Compatible with Token-2022 extensions, including:
 - Transfer hooks
 - Default account state
 - Optional compliance features (if required during Launchpad review)

Planned Distribution

(illustrative; subject to refinement)

| Bucket | % | Vesting / Notes |
|----------------------------------|------|---|
| Public Sale (Pre-sale + TGE LP) | 20 % | 10% at TGE, 3-month cliff, 12-month linear |
| Community & Liquidity Incentives | 25 % | Emissions over 36 months; on-chain schedule |
| Treasury / Ecosystem | 20 % | DAO-controlled via governance |
| Team & Advisors | 20 % | 12-month cliff, 36-month linear |
| Strategic Partners | 10 % | 6-month cliff, 24-month linear |

| | | |
|-------------------------|-----|------------------------------|
| Reserve / Market Making | 5 % | Unlocks per liquidity policy |
|-------------------------|-----|------------------------------|

Next Steps

- Token profile verification and metadata updates on Solscan (after branding, site, and socials finalization).
- Submission to Solscan Information Center for official indexing and verification.
- Integration into VECT.AI Widget / Frontend for testing wallet connectivity.
- Preparation of the 1:1 swap plan for migration to the audited VECT.AI main token.
